

Project Status report

Name: Mohammed Alharbi
Community (UN SD goal): SDGs 4 and 10
MVP #: MVP 1 & MVP 2
Sprint cycle dates: 01 November 2023

Project Name

Eventeer.

Blurb

I am working on "Eventeer," a platform for students to find and join events at their school. It matches with two UN goals: Quality Education and Reduced Inequalities. The main reason? Students want to join events but do not always know about them. At the same time, clubs need more people to come to their events. "Eventeer" helps solve this. It lists all events in one place, so students can easily find them.

For Week Ending

14 November 2023

Project Status

Green

Status Description

My project is currently in a positive status green. I am content with my current progress, having successfully completed MVPs 1 and 2. In the previous scrum, I accomplished several key tasks: connecting to the database, setting up a local environment, and developing the main, login, and signup pages. During this scrum, I focused on creating an events form, compiling a list of events, event detail page, designing the profile page, and developing the badge page. The only remaining task is the completion of MVP3.

Activities—During the past sprint cycle

During the past sprint cycle, as the sole member of the team, I accomplished the following activities:

- Events page.
- List of events.
- Profile page.

Project Issues

As of the current reporting period, I'm pleased to note that there have been no significant issues encountered in the project.

Project Changes

My main page, which was previously blank, now features a series of event cards. These cards are interactive, allowing users to click on them to view detailed information about each event.

Activities—Planned for Next Week

As the sole member of the team, my planned activities for the upcoming week include:

- Further development of the Badge system.
- Enabling functionality to join events through a 'click to join' feature.
- Implementing the display of badge information.

Reflection

Do you feel "on track"?

Yes, I feel I am on track

What progress do you particularly feel good (great) about?

Having a list of events on the main page, giving users the ability to edit their events after creation, and successfully displaying badges on the badge page.
