

Project requirements

Name: Mohammed Alharbi

Community & UN SDG(s): SDGs 4 & 10

Date: 13 October 2023

Project Name

Eventeer

Functional Requirements

- i. Event Participation: Users should be able to register for and participate in listed student events.
- ii. Event Location: The platform should display the location of each event, possibly integrated with map services for easy navigation.
- iii. Attendee Count: Users should be able to view the current number of registered participants for each event.
- iv. Event Badges: After participating in an event, users should earn event-specific badges as a recognition of their involvement and contribution.

Technical/Performance Requirements

- i. Platform Compatibility: The website should work smoothly on browsers.
- ii. Database: Use database to store details like user profiles, events, and badges.
- iii. Security: Ensure data safety with SSL certificates and encrypted user information.
- iv. Map Features: Integrate with Google Maps to show event locations.
