Project scope

Name:	Mohammed Alharbi
Community & UN SDG(s):	SDGs 4 & 10
Date:	13 October 2023

Project Name	Eventeer

Project Deliverables	
User Profile Management	**User Registration:** Allow students to sign up using email or social media accounts. Ensure data validation and security measures during the registration process. **User Profile Customization:** Enable students to add or edit personal details, upload a profile picture, list skills or interests, and set event preferences.
Event Creation and Management	**Event Creation:** Provide an interface for students or organizations to create events, set dates, venues, and add event details. **Event Search and Filter:** Allow students to search for events based on keywords, date ranges, or categories. Implement filtering options for better search results.
Feedback and Reviews	**Event Feedback:** Allow attendees to provide feedback on events they've attended, helping organizers improve future events.

User Reviews:

Implement a system where users can review and rate events, providing insights for other potential attendees.

Project Exclusions

1. Mobile Apps: The project will focus primarily on the development of a web-based platform. Dedicated mobile applications for iOS and Android will not be included in the current scope.

2. Event Videos: While the platform will support event listings, descriptions, and other textual or image-based content, the integration of videos or video-based content about the events will not be a part of the project's current scope.
